📅 Born: 1996

About me

Despite being self-taught, programming is so in-line to my way of thinking that people have often considered me a robot; sometimes an alien. I revel in complexity and always love that feeling of ignorance, and the subsequent emotion that comes with understanding. I'm up for any challenge and will take any opportunity to leave this world better than I found it.

Skills

Hacker★ Scientist★ Manager★

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

Interests

I'm interested in working on any difficult problems and learning as much as I can. Generally, this includes any kind of engineering and theory of biology through math.

Projects

- 2020 **Web Infrastructure** <https://web.infrastructure.tech/architecture/>
Globally distributed Kubernetes cluster & auto-managed WordPress.
- 2021 **eons basic build system** https://github.com/eons-dev/bin_ebbs
Extensible build system for any language and process, all in python.
- 2022 **Mood Recorder** <https://moodrecorder.org>
App for improving emotional wellness.
- soon **Biology** <https://github.com/develop-biology>
Open source graphical processing.

Experience

- 2015-2019 **Co-founder and Software Engineer for Brain2Bot** Reno, NV
Brain2Bot took advantage of novel neuroscience to create a software platform for building brains. We worked on everything from robot pets to video game characters running on Android. The software was all C++ and included a cross-platform gui in Qt.
- 2016-2018 **Secretary & Performer for the Reno Video Game Symphony** Reno, NV
Designed & implemented organization management logic in the form of a constitution. Filed and was approved for 501(c)(3) status with the IRS. I also played bassoon for the group for many years.
- 2017-2021 **Research Associate for ZeaKal** Reno, NV
ZeaKal is a biotech company focused on refining & implementing novel genes into various crops for the purpose of feeding the world as climates change. I worked or advised on nearly all parts of the engineering pipeline, including: designing DNA sequences, transforming plants, growing & caring for plants, repairing & maintaining growth chambers & greenhouses, pest management, tissue sample preparation, and analysis of samples both experimentally and computationally.
- 2021-now **Founder & CEO of eons LLC** Reno, NV
I created eons LLC to be a tech company positioned between science and consumers. We focus on accessibility and user engagement as well as on sustainable designs that automate away maintenance and give our clients more time to spend on their content. By capturing emerging technologies, my team and I have been able to facilitate an array of science-delivery projects and bring new advancements to the public.

Education

- 2013-2017 **B.S. Biochemistry & Molecular Biology** University of Nevada, Reno
Wrote thesis: "Overexpression of DGAT1 and Modified Cysteine Soy Oleosin Increases Oil Content in the Green Tissue of *Arabidopsis thaliana*", also earned a minor in mathematics.
GPA: 3.402

Achievements

- 2014 **Eagle Scout of the Boy Scouts of America**
